

Power domination of graphs

Mickael Montassier

LaBRI, University of Bordeaux, France
CNRS, Paris, France

EXTENDED ABSTRACT

Instructions to authors. Authors have just to complete this \LaTeX file. First enter title, names of authors, and affiliations in `titleArea` environment. You can use different macros:

- `\author{firstname}{lastname}{referenceToAffiliation}`
- `\authorWithoutReferenceToAffiliation{firstname}{lastname}`
- `\affiliation{labelOfTheAffiliation}{name of the affiliation, address, country}`
- `\affiliationWithoutReferenceToAuthor{name of the affiliation, address, country}`

See the different example files. Then add your extended abstract in the `extendedAbstract` environment. The bibliography has to be written in this file in the `thebibliography` environment. You can use as usual environments `theorem`, `proposition`, `lemma`, `property`, `corollary`, `conjecture`, `example`, `problem`. For examples:

Theorem 1 (Authors 'Year [6]) *Statement.*

Conjecture 2 *Statement.*

If you want to insert figures, then insert figures with `.eps` format as follows (see Figure 1):

Figure 1: The graph $G_{d,a,b}$

Finally, the extended abstract must not exceed two pages and must be submitted in `.pdf` format to:

<https://www.easychair.org/account/signin.cgi?conf=bgw2012>
